Full stack - Python

Python · SQLite ·

Self-taught

2022-ACT

LinkedIn learning, Cisco, Platzi, FreeCodeCamp, W3School

My name is Melisa, and I am currently studying full stack development. Although I haven't settled on specific technologies yet, I am leaning towards Python for the backend and React for the frontend. However, this doesn't mean that I would reject the opportunity to learn other tools if presented with a proposal.

My main objective at the moment is to secure an internship at an established company that is interested in nurturing and developing professionals. I am eager to gain hands-on experience and apply my knowledge in a real work environment.
